

Haris Naveed

Senior PHP / Laravel Developer ■ GoHighLevel Specialist ■ AI Automation Engineer

haristhedeveloper@gmail.com | +92-312-1592007 | github.com/harisnaveed

Senior Software Engineer with over 5 years of professional experience specializing in PHP/Laravel backend architecture, GoHighLevel (GHL) CRM & AI automation, and React.js web applications. Expert in engineering scalable REST APIs, WebSockets, Voice & Conversation AI, prompt engineering, and automated workflows. Proven track record in building enterprise POS systems, third-party payment/carrier integrations, and SaaS solutions for international clients.

Education

BS Computer Science

Islamabad, Pakistan | 2015 – 2019

International Islamic University

Courses: Web Development, Data Structures, Digital Logic Design, Design and Algorithm Analysis

Work Experience

OC ANALYTICA ■ Senior PHP / Laravel Developer & GHL Specialist

July 2021 – Present

- Spearheaded backend architecture for 15+ web and mobile enterprise applications using **Laravel** and **PHP**, designing secure REST APIs, authentication, authorization, and queued background job processing.
- Architected enterprise **GoHighLevel (GHL)** CRM solutions and workflow automations, implementing **Conversation AI**, **Voice AI**, prompt engineering, and training custom AI agents for automated lead qualification and booking.
- Configured end-to-end GHL automation systems including calendar scheduling, appointment pipelines, opportunities, custom fields, Missed Call Text Back, IVR, Reviews AI, and multi-channel SMS/Email/WhatsApp campaigns.
- Managed **Twilio** integrations, phone number configuration, and secured **A2P 10DLC** registration compliance for US & Canada carrier messaging standards.
- Developed custom **GHL Private Integrations**, utilizing REST APIs, Webhooks, authentication tokens, and Export Conversations API to synchronize GHL CRM data with external database systems.
- Integrated Facebook, Instagram, and Google Business Profile channels into unified messaging workflows for automated lead capture and follow-ups.
- Engineered real-time communication modules and event broadcasting using **Laravel Reverb**, **Laravel Broadcasting**, and **Ratchet PHP** WebSockets for live chat modules and Point of Sale (POS) application dashboards.
- Modeled and optimized high-performance **PostgreSQL** and **MySQL** databases, indexing complex queries for rapid data retrieval and reliable transaction management.
- Collaborated with frontend engineers to integrate dynamic **React.js** components with backend APIs, ensuring responsive UI and optimal web performance.
- Designed scalable hosting infrastructure, managed deployment workflows, and optimized media delivery pipelines for production environments.

OXMITE ■ PHP Developer

Dec 2019 – June 2021

- Engineered and maintained high-performance web services and backend APIs using **PHP**, supporting diverse frontend frameworks and third-party integrations.
- Managed server and database administration tasks using **cPanel** and **SiteGround** Linux hosting environments, optimizing for high availability, security, and scalability.
- Designed, tuned, and maintained **PostgreSQL** database schemas to secure server-user data interchange and minimize query response latency.
- Conducted continuous testing, profiling, and debugging of backend systems, applying best practices across the software development lifecycle.

Projects

Boostmyrepair.com (<https://boostmyrepair.com/>) *HTML, CSS, Bootstrap, JavaScript, PHP, MySQL, Stripe, PayPal, cURL API, PHPMailer*

- Engineered dynamic web repair service platform featuring a robust PHP backend architecture, Bootstrap interface, and cURL API integrations.
- Integrated **Stripe** and **PayPal** payment libraries to support secure payment processing, subscription management, and auto-generated invoices.
- Built a comprehensive custom administration portal for tracking repair orders, customer subscriptions, and billing transactions.
- Utilized **PHPMailer** for reliable, automated email notifications and customer receipt communications.

Biidon (<https://biidon.com/>) *Vanilla PHP, MySQL, Stripe, Google Maps API, CSS Grid, JavaScript*

- Architected repair service quotation platform with custom Vanilla PHP backend and interactive JavaScript front-end.
- Integrated **Google Maps API** for geolocation tracking and location-aware repair service estimates.
- Incorporated **Stripe Payment Library** for secure online payment workflows and deposit processing.
- Designed responsive UI layouts with CSS Grid and built an admin panel for real-time quotation and financial transaction tracking.

Cellzone Phone Repair (<https://cellzonephonerepair.com/>) *WordPress, WooCommerce, Elementor, Stripe, PayPal, Affirm, UPS Shipping, WPSyncSheets*

- Developed e-commerce platform on WordPress using WooCommerce and Elementor, tailored for mobile repair products and service booking.
- Configured multi-gateway payment processing supporting **PayPal**, **Stripe**, and **Affirm** financing options.
- Integrated automated **UPS Shipping API** to dynamically calculate shipping rates during checkout.
- Implemented **WPSyncSheets** to synchronize WooCommerce products, orders, and inventory real-time with Google Sheets.

Cellularciti (<https://cellularciti.com/>) *HTML, CSS, Bootstrap, JavaScript, Vanilla PHP, MySQL, Stripe*

- Created mobile e-commerce platform featuring a custom PHP **session-based** cart architecture and checkout flow.
- Integrated **Stripe** for credit card payment processing and secure transaction handling.

Gadget ResQ (<http://gadgetresq.com/>) *HTML, CSS, Bootstrap, JavaScript, Vanilla PHP, MySQL, Google Sheets API*

- Developed front-end and back-end for Gadget ResQ website, providing smooth navigation and customer quote submission flows.
- Engineered an automated web dashboard connected to **Google Sheets API** to fetch and render real-time operational metrics.
- Built secure backend data handling and validation pipelines to ensure high performance and storage scalability.

QR Setup (<https://github.com/harisnaveed/qr-code>) *Vanilla PHP, JavaScript, HTML, CSS*

- Built a web application and **QR code generator** supporting dynamic data types for convenient mobile information sharing.

Skills

Programming Languages: PHP, JavaScript (ES6+), HTML5, CSS3, SCSS

Backend Architecture: Laravel, Core/Vanilla PHP, REST APIs, WebSockets (Ratchet) and Laravel Reverb for Broadcasting, Queues

Frontend Development: React.js, jQuery, Alpine.js, Tailwind CSS, Bootstrap

CRM & AI Automation: GoHighLevel (GHL), Conversation AI, Voice AI, Prompt Engineering, AI Agents, Workflow Automation, Twilio, A2P 10DLC, Webhooks

Databases: PostgreSQL, MySQL

CMS & E-Commerce: WordPress, WooCommerce, Elementor, WPSyncSheets

Payment & Integrations: Stripe, PayPal, Affirm, Google Maps API, Google OAuth, UPS Shipping, PHPMailer, TCPDF, cURL

Cloud, Hosting & Tools: Git, GitHub, Composer, cPanel, SiteGround, Linux Hosting, VS Code, Visual Studio, Cursor, Notepad, PhpStorm, SEO
